

Open position for HiWi in Digital Heritage

Job

The Chair of Building Archaeology and Construction History is looking for a HiWi to work on digital models of historical buildings. Your main tasks consist in measuring buildings with advanced surveying techniques (laser scanner and photogrammetry), processing point clouds and converting them into digital or physical 3D models. This job is an opportunity to learn about the latest surveying techniques and collaborate with young researchers on exciting projects in the field of heritage.

ETH zürich

www.holzer.arch.ethz.ch

Profile

You are an ETH MSc student interested in the built heritage and in digital surveying techniques. You are an excellent user of 3D modelling software.
