
- **Summary of the Thesis**
  - Research questions / research gap / goals and embedding of these into the research landscape of the discipline
  - Brief description of overall structure (monography / paper dissertation, parts/chapters/appendices) and the thematic thread (if any) through the dissertation
  - Brief summary of each chapter and its content, pointing out strengths or weaknesses
  - Brief comment on role of chapter within entire thesis and on contribution to answering the research questions / filling the research gap

- **Assessment of the Thesis**
  - Are the research questions/goals clear and adequate?
  - Are the topic and research questions embedded in the context of the discipline?
  - Originality and degree of innovation?
  - Impact (e.g. through papers contained in the dissertation) on future research and on the discipline visible or expected?
  - What are particular strengths and/or shortcomings/weaknesses of the thesis?
  - Comment on quality and adequacy of overall structure.
  - Comment on quality of presentation: figures, tables, equations.
  - Comment on quality of text: clarity, language, conciseness
  - If the manuscript needs to be modified before final submission (after examination) and before making it publicly available, indicate the extent of the necessary adaptions: formal corrections only, corrections/extension of content.

- **Formal Aspects**
  - Length: as required to address above items (typically 2-4 pages)
  - ETH Zurich has no grading scale for doctoral theses. Recommendation on acceptance/rejection of the thesis as a closing statement is sufficient
  - Format: proper letter head with contact details and signature; pdf sufficient
