Structura C GmbH stands for sustainability in construction – characterized by respect for people and nature. This Swiss supplier of sustainable building materials focuses on high-quality natural composite materials for insulation, which consist of 100 percent natural products, with hemp and lime, and meet the highest ecological requirements.

Alexandre Akchoti will present how Structura C is a holistic partner for building owners, architects and other construction specialists who are concerned about sustainability. They offer technical advice and support in planning and implementation.
