# PANEL DISCUSSION

## CLIMATE POSITIVE CONSTRUCTION:

## SCALING UP

## EARTH CONSTRUCTION

SPECIAL GUEST  
**BETTINA BAGGENSTOS**  
Blumer Lehmann

GUESTS  
**ULRICH RÖHLEN**  
Claytec  
**JONATHAN ENSSLIN**  
Oxara

MODERATOR  
**ARNAUD EVRARD**  
ETH Zurich  
**FABIAN HÖRMANN**  
The Real Deal

CLIMATE POSITIVE CONSTRUCTION FRIDAYS ARE A SERIES OF EVENTS TO ACCELERATE THE NECESSARY TURNAROUND IN THE CONSTRUCTION SECTOR. URGENCY IS DEMANDING ACTION TODAY.

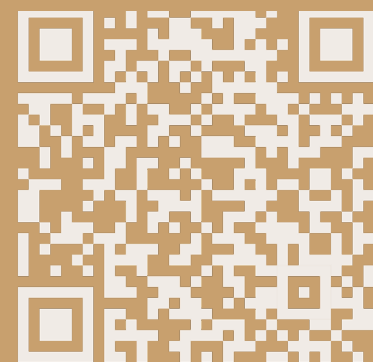

For this second edition, we wish to focus on "Scaling up Earth Construction". We have the pleasure to host a special guest:

Bettina Baggenstos: specialized in timber construction. She works at Blumer Lehmann and manages the on-site earth construction of the Hortus office building.

Two complementary guests, who already contributed to this Module, will be participating to enrich the discussion and help examine different attitudes towards earth as construction: Jonathan Ensslin, Lead of Construction & Application at Oxara and Ulrich Röhlen, Technical Director at Claytec

This event is co-organized by ETH Zurich – Chair of Sustainable Construction and by The Real Deal – Post-Fossil Construction for Game Changers in the framework of the CAS ETH in Regenerative Materials -Essentials.

Don't hesitate to attend with the link here under.
