FABIAN HÖRMANN
The Real Deal

CLIMATE POSITIVE CONSTRUCTION FRIDAYS ARE A SERIES OF EVENTS TO ACCELERATE THE NECESSARY TURNAROUND IN THE CONSTRUCTION SECTOR. URGENCY IS DEMANDING ACTION TODAY.

For this fourth edition, we focus on:

“Changing perspective on the existing building stock”.

This time we will invite two representatives of large portfolio holders.

They will give insights of their current activities in the field of re-use and renovation constructions to enhance the process from concept to realization as a new standard.

Drazenka Dragila Salis, Head of Development and Construction at Swiss Prime Site.

Philipp Morger, Head of Sustainability at City of Zurich Immobilien.

In addition, we also invite one practitioner actively facilitating implementation of new processes and concepts:

Renaud Haerlingen, Independent Architecture & Planning Professional, former at Rotor, Brussels.

For a broad effect, this event can be attended online at
<https://ethz.zoom.us/j/62100868612>

We explicitly invite the wider public and decision-makers.
