## PUBLIC LECTURE

Blanca Gardelegui is an architect and researcher, with expertise in a sustainable and social approach to the design of collaborative projects, ranging from the ReUse of materials to the circularity of local resources. Blanca is a reuse expert at Zirkular, a specialist planning office for circular buildings and the ReUse of building components. She consults different public pilot projects from the cities of Zürich and Basel, where the reduction of materials and carbon emissions is a high priority. Blanca also teaches at the AA Summer School, tackling the circularity of resources. Previously, she was a researcher at ETH Zurich and KIT Karlsruhe Institute of Technology and taught at Chulalongkorn University in Bangkok. With a background in design, Blanca has worked with Kosmos Architects to design prototypes within the context of circularity. After her master's studies at ETSAB Barcelona, she worked for Herzog & de Meuron for five years.
