PUBLIC LECTURE

GRAMITHERM EU SA specializes in sustainable insulation made from natural silage grass boards. Their solutions are eco-friendly, promote energy efficiency, and support healthy, comfortable living. They collaborate with local agricultural partners and prioritize community-focused, short-circuit distribution.

Christian Roggeman, Founder & CEO, brings over 30 years of leadership in the building materials industry. Previously, he led Owens Corning's European Building Materials division and managed Tarkett Sommer France's Retail/DIY product division. He began his career with the Solvay Group in international roles and holds a degree from Solvay Business School (University of Brussels). Christian will share his vision for a global approach to sustainable insulation, grounded in local collaboration.
