

Conservation of monuments and historic structures: Methodology, research and practice

Dienstag, 20. Oktober 2015

17:00 Uhr

Auditorium HIL E 3 (Lehrgebäude Bauwesen)
ETH Zürich, Hönggerberg, 8093 Zürich

Paulo Lourenço

Prof. Dr.

University of Minho
Guimarães, Portugal

Modern societies understand built cultural heritage as a landmark of culture and diversity. Only during the last decades the idea that ancient buildings could be conserved and reused became appealing. Large investments have been concentrated in this field, leading to impressive developments in the areas of inspection, non-destructive testing, monitoring and structural analysis of historical constructions. These developments, and recent guidelines for reuse and conservation, allow for safer, economical and more adequate remedial measures. The presentation addresses the issues of the methodology to adopt, of different cases studies and of present challenges.

Anschliessend an den Vortrag ist ein gemeinsames Nachtessen mit dem Referenten im Restaurant Die Waid, Waidbadstrasse 45, 8037 Zürich vorgesehen.

Nächster Vortrag: Dienstag, 17. November 2015, 17:00 Uhr, HIL E 3
Prof. Dr. Viet Tue Nguyen, Technische Universität Graz, Österreich
"Neuer Ansatz zur Ermittlung der Mindestbewehrung für dicke Stahlbetonbauteile"
