

Call for Papers & Special Issues

ASCE-ASME Journal of Risk and Uncertainty in Engineering Systems: Part A. Civil Engineering Part B. Mechanical Engineering

First Joint Society
Journal: Papers needed
for inaugural issues

Editor in Chief

Bilal M. Ayyub, University of Maryland, USA

Advisory Board

Alfredo H.-S. Ang, USA
Kenneth R. Balkey, USA
Richard E. Feigel, USA
Gerald Galloway, Jr., USA
Richard Wright, USA

Associate Editors

Nii Attoh-Okine, USA
Michael Beer, UK
Armen Der Kiureghian, USA
Peggy Johnson, USA
James Lambert, USA
Sankaran Mahadevan, USA

Editorial Board

Badiru Adedeji, USA
Ivan Sui-Kui Au, UK
Terje Aven, Norway
Robert J. Budnitz, USA
Joel Conte, USA
Gilberto de Souza, Brazil
James Englehardt, USA
Scott Ferson, USA
Dan Frangopol, USA
Paolo Gardoni, Canada
Ramana Grandhi, USA
Seth D. Guikema, USA
Jim Hall, UK
Bruce Hallbert, USA
Terje Haukaas, Canada
Hector Jensen, Chile
Xiaomo Jiang, USA
Zhan Kang, China
Samuel Labi, USA
Dian Qing Li, China
Richard Liew, Singapore
Yongming Liu, USA
Shalva Marjanishvili, USA
Larry Mays, USA
James J. Mori, Japan
Arvid Naess, Norway
Taha B. Ouarda, UAE
Kurt Petersen, Sweden
Shankar Sankararaman, USA
John Sobanjo, USA
Junho Song, S. Korea
John Sorenson, Denmark
Jery Stedinger, USA
Mark Stewart, Australia
Daniel Straub, Germany
Bruno Sudret, Switzerland
Sviatoslav Timashev, Russia
Jan-Erik Vinnem, Norway
Reino Virolainen, Finland
Enrico Zio, Italy

Background

Risk and uncertainty in engineering has the challenging characteristics of being multidisciplinary, cross cutting and system centric. To meet this challenge, the ASCE-ASME Journal of Risk and Uncertainty in Engineering Systems is society wide, cutting across committees, councils, divisions and institutes. It meets the needs of researchers and engineers for addressing risk, disaster and failure-related challenges due to many sources and types of uncertainty in design, analysis, operation and life-cycle management of not only existing but also modern engineering systems. It helps to fulfill the ASCE and ASME visions.

Objectives

The objectives of the journal are to (1) serve as a medium for dissemination of research findings, best practices and concerns, and for discussion and debate on risk and uncertainty related issues; and (2) report on the full range of risk and uncertainty analysis state-of-art and state-of-practice relating to all civil and mechanical engineering and other related fields including but not limited to risk quantification based on hazard identification, scenario development and rate quantification, consequence assessment, valuations, perception, communication, risk-informed decision making, tradeoff analysis, resilience and sustainability.

Special Issues

Proposals for special issues are welcome. If approved by the editors, proposers will be appointed as guest editors to solicit papers and manage the paper review.

Selected Focus Topics

Selected focus topics are grouped as follows:

- Multidisciplinary areas (risk methods, uncertainty analysis and quantification, reliability, safety, management, financial & insurance issues, computational methods, systems, resilience, and sustainability)
- Civil engineering areas (infrastructure, construction, environmental, transportation, water resources, coastal engineering, construction engineering, project management, and lifecycle)
- Mechanical engineering areas (mechanical assets and infrastructure, materials and electromechanical, energy-related including nuclear, gas and renewable sources, and manufacturing)
- Related areas (coastal and ocean systems, bioengineering, climate change adaptation, information storage and processing, finance, economics, robotics, automation, and control)

Paper Submission

The journal is administered in two parts by ASCE and ASME. Depending on the topic covered in your paper, you may submit to either of the following parts:

Civil Engineering (ASCE) <http://jrnrueng.edmgr.com/>
Mechanical Engineering (ASME) <http://bit.ly/1fjTQCc>

Resources for Authors

Civil Engineering (ASCE) <http://bit.ly/1fjV7sS>
Mechanical Engineering (ASME) <http://bit.ly/1dakPMp>
