

Applied AI and High Performance Systems Group Intelligent Cloud Technologies Laboratory Huawei Munich Research Center

HUAWEI CLOUD

Our mission is to build solutions for enterprise intelligence in the cloud. We specialized in designing, developing, and deploying, end-to-end systems. We fuse in our pipelines: mechanistic mathematical and statistical modelling, artificial intelligence and machine learning, simulation, and computing systems for building adaptive, robust, and resilient solutions.

Team of 10 research scientists with diverse backgrounds, from physics to robotics, and from computer science to civil engineering.
