

Seminar Special Topics in Theoretical Chemistry HS 2007

Date Time	Titel Speaker	Place
20.09.2007 13:00	Ab initio study of magnetic compounds: from molecular to periodic systems Boris Le Guennic	HCI-J243 (ETH)
27.09.2007 13:00	Excited states in the random phase approximation: a molecular-orbital-free algorithm Melissa Lucero	34-K-01 (Uni)
25.10.2007 13:00	Towards an atomistic picture of dye sensitized solar cells Florian Schiffmann	34-K-01 (Uni)
22.11.2007 13:00	Density Functional Investigation of the Schrock Mechanism of Dinitrogen Reduction Stephan Schenk	HCI-J3 (ETH)
06.12.2007 13:00	Topological Analysis of Electron Densities from Kohn-Sham and Subsystem Density Functional Theory Karin Kiewisch	HCI-J3 (ETH)
20.12.2007 13:00	Towards the Calculation of Raman Optical Activity Spectra for Large Molecules Sandra Lubert	HCI-J3 (ETH)
