

“Beating the Heat”

- Conference on urban climate and its impact

ETH Zürich – Friday September 15th, 2023

SCOPE

Situated within the field of urban climatology and related disciplines, the conference will not only offer an opportunity to present findings from past and on-going research projects as well as practical application in planning and in implementation, but also aims at providing a platform to network and strengthen the exchange of the Swiss research, service and implementation community focusing on the **multifaceted interactions between cities, climate (change), and human health**.

KEYNOTE

Research: Matthias Roth – UCL NUS, Singapore
Planning: Gregory Grämiger - ARE-Kanton Zürich
Health: Martina Ragettli – Swiss TPH, Basel
Applied Research: Jan Remund – Meteotest, Bern

VENUE

ETH Zürich Campus Zentrum - Main Building HG E5

CONTRIBUTIONS

We invite contributions on all aspects of urban heat, from implementation and measurement-based approaches over planning and modelling and simulation studies to research on impacts on human health and mitigation measures. Most contributions will be in poster format. We particularly encourage interdisciplinary submissions and contributions from young researchers and practitioners.

ABSTRACT SUBMISSION AND REGISTRATION

1. Open account. 2. Submit abstract (deadline July 9th, 2023).
 The conference is free, registration is required: Register (deadline August 20th, 2023).
