

The 2nd International Symposium on Infrastructure Asset Management (SIAM 2017)

ETH Zurich, Switzerland - June 29-30, 2017

© 2016 Clemens Kielhauser, ETH Zurich

OBJECTIVE

The 2nd international symposium on infrastructure asset management, as the 1st one, is a symposium that allows a small group of researchers, who are focused on the development of methods and processes to be used in the management of infrastructure, to present and discuss their most advanced ideas. There is no focus on a particular type of infrastructure.

TOPICS

All topics related to methods and processes that can be used in the management of infrastructure, including those to determine optimal monitoring and intervention strategies and programs. Some examples are 1) methods to improve the modelling of deterioration or changes in what is expected of infrastructure, 2) improved ways to conduct parts of the infrastructure management process, such as risk assessment or the development of intervention programs, and 3) the role of contractual agreements in the effectiveness of the management of infrastructure.

VENUE

The Swiss Federal Institute of Technology, Zurich
Hoenggerberg Campus
Institute of Construction and Infrastructure Management (www.ibi.ethz.ch/en)
Building HIL Floor E room 10.1
(www.siam2017.ethz.ch/venue)

© ETH Zurich

SUBMISSION

All participants are to submit 300 word abstracts by **Dec 18, 2016**, and to submit the complete articles by **April 30, 2017**. via email to wellauer@ibi.baug.ethz.ch
The MS Word and Latex templates are available on the web site (www.siam2017.ethz.ch/submission).
There is no page limit but participants are encouraged to keep their text as concise as possible.

REGISTRATION

Each participant is asked to register by **Dec 18, 2016**.
A small registration fee will be required to cover refreshments, lunches and the dinner.
Recommended hotels can be found on the SIAM web page (www.siam2017.ethz.ch/travel/accomodation).

PROCEEDINGS

There are no proceedings.
To facilitate the discussions, however, hard copies of each paper will be distributed at the beginning of each session.
PDFs of all papers will be distributed on a USB stick to the participants.
There are no copy rights associated with the symposium so it is possible to send PDFs of

- recently submitted but not yet accepted papers,
- papers close to submission where you would be interested in having feedback that you may incorporate into the paper,
- work that has recently been published at a conference but has not yet been published in journal paper form, and in exceptional circumstances,
- work that has recently been published in journal paper form.
