Welcome to the Swiss Mobility Panel study. This survey aims to better understand mobility issues in Switzerland.

It will take around 25 minutes to complete the following survey. We will invite you to one or two such surveys for the Swiss Mobility Panel study per year and would be very grateful if you could participate in future surveys too.

Participation in this study is voluntary, and you may withdraw your participation or your data at any time.

The data generated from this survey will be stored and analyzed in a confidential form that does not allow conclusions to be drawn about individual study participants. There are no known risks posed by participating in this study. The study has been reviewed and approved by ETH Zurich's Ethics Committee (EK-2020-N-135).

By clicking "continue" below, I hereby acknowledge that I have read and understood the above information and agree to participate.

D5 If a vote were held today in Switzerland, would you be in favor or against mandating that only new cars without gasoline or diesel engines (i.e. pure electric cars or cars that are fueled with hydrogen) can be registered from 2035?

- [1] Very much in favor
- [2] Somewhat in favor
- [3] Neither for nor against
- [4] Somewhat against
- [5] Very much against

D6 One liter of gasoline or diesel currently costs around 2.10 CHF. Should the federal government raise taxes on gasoline and diesel to encourage car owners to switch to electric or hybrid cars?

- [0] No
- [1] Yes

If answer to D6 “Should the federal government raise taxes on gasoline and diesel to encourage car owners to switch to electric or hybrid cars?” is [1] “Yes”:

D7 If yes, how much of an additional tax should be placed on the petrol/diesel price per liter?

[1] 0 CHF; [2] 0.10 CHF; ... [13] 1.30 CHF; [14] 1.40 CHF; [15] 1.50+ CHF

Now we would like to ask you a few more questions about your attitude towards public transportation.

Due to the limited financial resources that the public sector (i.e. the federal government, cantons and municipalities) can invest in public transport, politicians will increasingly have to decide in which areas public transport should be further expanded in the future.

In your opinion, what percentage of the total publicly funded transport budget (federal government, cantons, municipalities) should be used for long-distance transport (more frequent and faster Regio Express and Intercity trains) and what percentage of this should be used for local and regional transport (more frequent and faster journeys by suburban trains, trams, buses)?
