Erläuterung Tabelle «Institutsvergleich Publikationen», KOF-Jahresbericht 2020, Seite 13

Der Institutsvergleich Publikationen auf Seite 13 basiert auf dem Institutsranking VWL des Forschungsmonitorings. Im Ranking, welches auch im Handelsblatt publiziert wurde, werden die Gewichte aller Publikationen von allen zum Erhebungszeitpunkt an einem Institut beschäftigten Ökonominnen und Ökonomen für die Jahre 2010 bis 2019 aufsummiert. Berücksichtigt werden nur im deutschsprachigen Raum (Deutschland, Österreich, Schweiz) ansässige Institute. Die KOF wird in diesem Ranking aufgrund ihrer vollständigen Zugehörigkeit zur ETH Zürich nicht als eigenständiges Institut angesehen und damit nicht in der offiziellen Berichterstattung berücksichtigt. Alle Daten zur Berechnung der Tabelle auf Seite 13 des Jahresberichts beruhen auf Daten des Forschungsmonitorings.

Das Standard-Ranking des Forschungsmonitorings basiert auf SJR-Gewichten, es gibt eine Co-Autoren-Korrektur, alle Zeitschriften werden relativ zur Top-5-Zeitschrift bewertet, das Mindestgewicht für eine Zeitschrift beträgt 0.025 und es werden alle Zeitschriften in der EconLit-Datenbank berücksichtigt.

Die Tabelle auf Seite 13 des Jahresberichts zeigt die Anzahl der aufsummierten, gewichteten Publikationen pro Institut. Die Spalte «Punkte» gibt die Berechnung der Veröffentlichungen in wissenschaftlichen Zeitschriften mit der Gewichtung der Zeitschrift wieder. In der Spalte «Autor» ist die Anzahl der zum Erhebungszeitraum (2019) an einem Institut beschäftigten Autorinnen und Autoren im deutschsprachigen Raum. Die Spalten «Ø Publikationen» und «Ø Punkte» zeigen die Anzahl an durchschnittlichen Publikationen pro Autor und Autorin sowie die Höhe der Punkte gemessen an der Anzahl der an einem Institut beschäftigten Autoren und Autorinnen.
