Swiss Nanomechanics Meeting

«applications of nanomechanics»

The Swiss Nanomechanics Meeting 2018 will bring together Swiss research groups, international guests, and industry partners with a common interest in optomechanics, force sensing, and nonlinear parametric mechanics.

On the one hand, the meeting will provide a platform to share and discuss recent progress in the field of nanomechanics. At the same time, we envision each speaker to outline the bigger vision behind their work and to put a spotlight on a concrete target application or fundamental scientific question. To this end, each group will contribute a talk of 25 minutes (plus 5 minutes for discussion), preferentially delivered by a junior scientist.

The meeting will take place within a single day on Höggerberg (ETH Zürich) and participation will be free of charge for all attendees. We will ask for registration at a later stage to facilitate the organization.
