

Microscopy Winter School 2025

Practical Course in Advanced Microscopy

20 - 24 January 2025

This advanced microscopy course is intended for PhD students and post-graduates with prior experience in microscopy. The goal of the course is to teach and train fundamental knowledge and skills in a specific microscopic technique.

Theoretical sessions will cover basic and advanced knowledge about all the different techniques and topics.

Practical work consists of five different modules each covering a specific topic:

- Advanced Light Microscopy
- Super Resolution Light Microscopy
- Sample Preparation for Electron Microscopy
- 3D Correlative Light and Electron Microscopy
- Volume Scanning Electron Microscopy
