

CSS Energy Debate

New U.S. Energy and Climate Policies under President Trump? Implications in a Transatlantic Context

Tuesday, 13 June 2017, 17:15 – 19:00, Room: LEE E 101, Leonhardstr. 21

“Lower costs for hardworking Americans” and “maximizing the use of American resources” are among the core energy policy objectives, U.S. President Donald Trump has announced after being elected in late 2016. Domestic changes and a potential withdrawal from the Paris Agreement on Climate Change would also have implications for Europe’s energy landscape. What can be expected from the new U.S. government? And what does this mean for global and European energy policies?

Dr. Tim Boersma, *Senior Research Scholar, SIPA Center for Global Energy Policy, Columbia University*

Comments: Dr. Severin Fischer, Senior Researcher, Center for Security Studies, ETH Zurich

Moderation: Prof. Dr. Tobias Schmidt, Head of Energy Politics Group, ETH Zurich
