Call for Papers: 3rd Zurich Workshop in AI+Economics

ETH Zurich and University of Zurich
December 6-7, 2024

Keynote Address by Melissa Dell

Submissions Deadline: July 19th, 2024

Submissions Form

Rapid expansions in AI technologies and data availability are transforming the economy while providing new tools for economic analysis. The **3rd Zurich Workshop in AI+Economics** brings together economists interested in (1) adapting AI tools – e.g. machine learning, natural language processing, computer vision — in empirical economics, or (2) empirical economic analysis of AI technologies. The workshop provides an opportunity for discussion and feedback on frontier works at this intersection of fields. Here is the program from last year's edition.

The workshop will be held in person in Zürich, Switzerland, on December 6-7, 2024. Melissa Dell, from Harvard University, will give the keynote. Participation is free, and funding is available for travel and accommodation expenses. Coffee and meals will be provided.

Submit papers, extended abstracts, or slide decks here by July 19th, 2024 AoE. Submitted papers should not yet be published. The conference is non-archival. Presenters of accepted papers will be notified by late August.

Organizers: Elliott Ash (ETH Zurich), Sergio Galletta (ETH Zurich), David Yanagizawa-Drott (University of Zurich).
