CAS ETH Nutrition

Certificate of Advanced Studies ETH in Nutrition for Disease Prevention and Health

Objectives

This course offers an advanced education that gives a broad overview on nutritional topics, the influence of nutrition on health, and its potential for prevention of diseases. CAS ETH Nutrition graduates are trained to distinguish and understand problems of nutrition while continuing to work in their field of expertise. This includes food industry, pharmacies, medicine, nutrition teaching, and nutrition research.

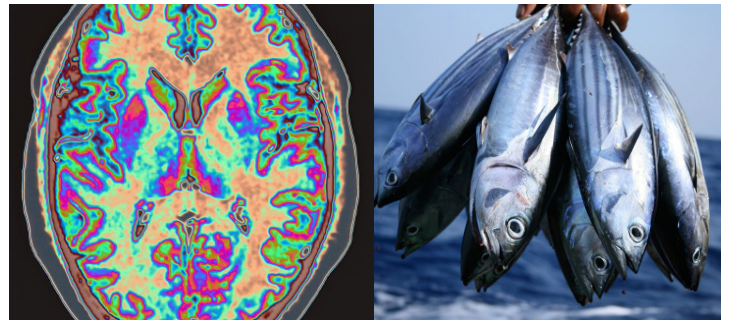

Programme

The lectures and seminars cover the following topics:

Dietary Etiologies of Chronic Disease, Physiology, Nutrition and Performance, Nutrition Case Studies.

Organization

The CAS ETH Nutrition programme is designed as part-time study during 2 semesters (1/2 - 1 day per week). Teaching is concentrated on Fridays in spring semester and on Thursdays in autumn semester. The general study language is English.

The title "Certificate of Advanced Studies ETH in Nutrition for Disease Prevention and Health" is awarded when 10 ECTS credits are achieved.

Requirements

Master's degree in Natural Sciences, Medicine, Pharmacy or Movement Sciences acknowledged by ETH or equivalent qualification.

Programme fees: CHF 5'800.-

Starting: Spring and autumn semester

Location: ETH Zurich Zentrum
