

## Internal Registration for Bachelor's Thesis in Computer Science (Bachelor Program Regulations 2016)

### 1. Preamble

The Bachelor's thesis is the final requirement of the BSc program. In most cases, the BSc thesis is written in the 6<sup>th</sup> semester. It is supervised by either one of the D-INFK professors or an associated professor. The thesis encourages students to show and produce a scientifically structured work. The Bachelor's thesis is a graded semester performance and worth 10 credit points, which corresponds to approx. 300 working hours. Various topics are offered. At least 5 of the 8 basic courses must be passed in order to start with the thesis. The supervisor of the thesis defines the start and end date. A written report will be prepared on the scientific studies carried out, followed by a final presentation. The thesis must be handed in within 6 months. The Director of Studies can extend the deadline for submission of a BT if the student has submitted a legitimate request (sickness, accident or similar reason).

### 2. Admission to the Bachelor's thesis

- At the beginning of the work, electronically register the Bachelor's Thesis: LE 252-0500-00L.
- Under "functions", select "project/papers/theses".
- Enter all the details (supervisor, co-supervisor, title, start and end date, upload task description).
- The signed plagiarism declaration (declaration of originality) is a component of your Bachelor's thesis.

### 3. Grading of the Bachelor's thesis

The Bachelor's thesis is a graded semester performance. In order to successfully complete the thesis, a grade of 4.00 or higher must be obtained. The completion of the thesis includes a presentation. A failed thesis can only be repeated once, but in this case, a new topic must be chosen and another professor can supervise the thesis.

In principle, the following evaluation scale is applied:

Grade	Requirements
6.00	Extraordinary quality, the results are much higher than expected.
5.50	Thesis results are very good; student expanded on the original theme.
5.00	Thesis meets expectations.
4.50	Thesis partially meets expectations and has minor deficits
4.00	Thesis meets minimum quality requirements; but has deficits and is below expectations.

#### **4. Submission and archiving of the Bachelor's thesis**

- An electronic version of the thesis must be submitted to the Studies Administration Office upon completion, containing the signed plagiarism declaration.
- The supervisor directly enters the grade via myStudies within 4 weeks upon completion of the thesis.

Zurich, January 2024

Prof. Dennis Hofheinz  
Director of Studies D-INFK.
