August 2021

Together with VMI, we are offering a new mentoring program for scientific staff at ETH. We have already formed the first set of pairs and are looking forward to seeing it in action!

On that note, you may have already heard about our mentoring for Bachelor's and Master's students. This year, there are some changes due to expand it in collaboration with VIS. If you are looking to help a new student start and organize her studies at ETH, stay tuned—we'll host a kick-off soon where mentors can meet potential mentees!

- Joel from CSNOW

Internal News

New mentoring program with VMI

for female PhD students

The transition between student and academic life can be tricky and confusing for everyone, from learning how to be a good researcher to thinking about your career goals - and anything in between! It often helps to informally chat with older peers that have faced similar problems and asked similar questions in the past. Unfortunately, for female PhD students it is not always easy to get to know older female PhD students or Postdocs, as there might not be (m)any in the same research group.

Therefore, CSNOW and VMI decided to start a new mentoring program whose goal is to help young female scientists to find a suitable mentor within our faculty. You can apply as a mentor or mentee at any time of the year—but we encourage you to sign up as soon as possible, so we can get to work finding you the most suitable mentor/mentee!

Interviews with D-INFK female professors

Manuel Rigger, a postdoc at our faculty, has recorded a great series of interviews with young professors talking about their path to a faculty position. The aim is to help other PhD students and postdocs with this transition. The series includes interesting interviews with two of our female professors: [Shweta Shinde](#) and [Ana Klimovic](#).

External Offers

Data Science for All / Women

The DS4A / Women program is designed to help female students and professionals develop into data-driven leaders of tomorrow. It is a free program that provides world-class technical training, professional development workshops, mentorship from senior leaders, competitive employment opportunities, and the opportunity to build your network of data-driven peers and leading organizations.

The application deadline is on August 8!

ZEISS Women Award

Are you working on new digital solutions as part of your thesis? Then apply for the ZEISS Women Award!

The ZEISS Women Award honors successful young female computer scientists with the goal to attract more women to pursue a career in the computer science industry. Female computer scientists who are about to complete their Bachelor's, Master's or PhD degree can take part. The patron of the award is Mrs. Elke Büdenbender, wife of the German President Frank-Walter Steinmeier.

The application is open until August 31!

Spark Your Digital Passion

McKinsey Case Workshop for Women in tech

During this virtual event, participants will learn about McKinsey's problem solving approach. In small teams you will solve a case study and help a retail company build its digital strategy.

- October 7-8, 2021
- Virtual

If you have any questions about the event, please reach out to [Claudia Galliker](#).

The registration deadline is on August 30!
