February 2022

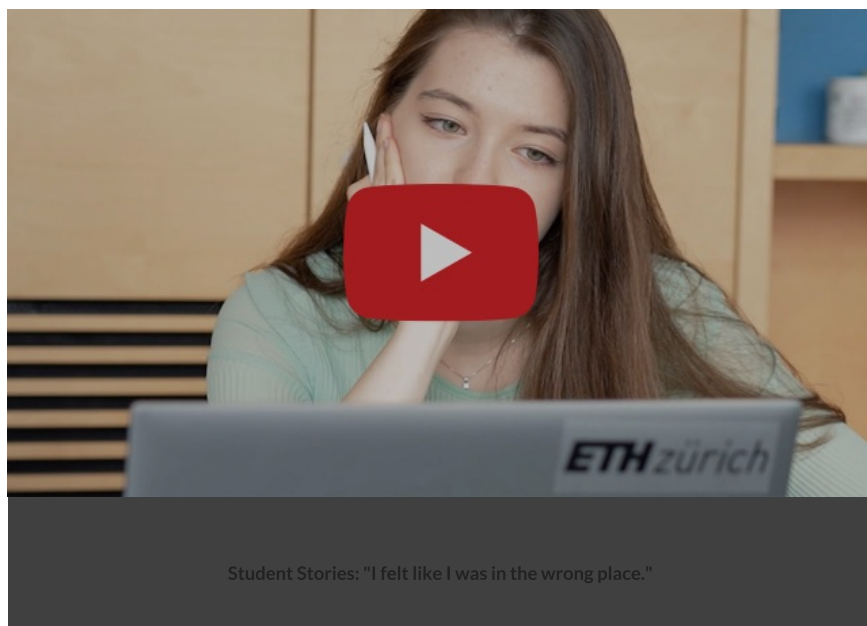

We hope you had a good start into the new year and that your exams are going well so far! We are excited to share a video interview with one of our members, Selin Baris, who talks about her experiences studying at ETH. Scroll down for a link and for other CSNOW news.

- the CSNOW team

Interview with a CSNOW member Selin Baris: "I felt like I was in the wrong place."

Studying at ETH Zurich is challenging, and all students have their own personal hurdles to overcome. ETH Zurich presents a short video series that gives a somewhat different insight into everyday life as a student. It provides an account of three students, their setbacks and how they dealt with them.

The first episode is about a member of our CSNOW team, Selin Baris. She talks about how she moved from Turkey to Zurich, how she got over her homesickness and how she learned to strike a balance between her studies and free time.

Workshop at EFCL - Save the date

The ETH Future Computing Laboratory (EFCL) invites CSNOW to a workshop! Targeting both undergraduates and graduates, students

are divided into groups and introduced to different aspects of hardware by scientists from EFCL, in a casual setting. The workshop will take place on **March 5th, 2022**, in the morning. More details are to come, so stay tuned!

Schnupperstudium

Twice a year, CSNOW organizes the “Schnupperstudium”, where we give female high school students insights into the world of computer science at ETH Zurich. The event targets German-speaking high school students (in Switzerland or abroad).

The next edition will take place at ETH from 16. to 18. February. The registration is still open so feel free to pass on the link below to interested students, or to teachers who may be able to share it with their students.

Women/Moms in Science - Call for short statements

Prof. Silke Langenberg from D-ARCH ETH is looking for statements on the topics of compatibility of work / children / relationship, effects children / desire for children on work, reactions from the environment

to personal decision, conscious decision against children for professional reasons, own experiences with parents in science, statements of own children (if these want to express themselves), etc.... Everything you think is important in this context !!! She not only looking for statements from professors, but also from younger researchers (female and male).

If you feel like sharing your opinion or experiences, please contact Prof. Langenberg directly via the button below.
