June 2022

Dear CSNOW community,

The semester is coming to its end but this doesn't mean that our events are over! We would be very happy to see you at our Summer Apero that we plan for the end of June. We also collected information various external events that are coming up.

We have one news in the way we present events to you. Namely, we indicate in the header of the event whether it mainly targets **students**  (bachelor and master) or **researchers**  (PhD's, postdocs, and scientific staff members of D-INFK) . This will hopefully help you to find the events that are the most relevant for you faster.

- the CSNOW team

---

## Welcome Yumi!

Hi, I'm Yumi and I come from South Korea! I lived in Germany before for 5 years until I moved to Zurich for my studies. Now I'm in my 4th semester of my CS bachelor's. In my free time, I like to cook and hang out with my friends, go jogging, paint and listen to music.

I joined CSNOW because I love helping people, organizing events and designing posters. And I love working with such kind, thoughtful and supportive people, and working for a good cause.

## CSNOW Summer Apero - Save the date

The semester is coming to an end, but we've already got you covered! For the first time post-Covid, the annual CSNOW summer apero is happening again. So if you're already missing apero season, be sure to save the date. We'll meet on **June 29 in front of CAB** to rewind the semester and reload energy for the upcoming exam season! As a bonus add-on: if you haven't yet had a taste of the latest creation of the student project house, there will be Orsini ginger liqueur at the event.

- June 29
- In front of CAB
- All members of D-INFK

### 📍 Help us redesign our website

CSNOW is looking for a student that would help us to redesign and translate our website to English. If you are fluent in German and English, and interested in a TA job, please contact us at [csnow@inf.ethz.ch](mailto:csnow@inf.ethz.ch).

---

### 📍 ETH x Accenture female networking

Are you a female student at ETH and would you like to get to know Accenture and their female community on June 1 during a tasty dinner? Then you might be interested in learning more details about the event and the registration procedure [here](#).

### 📍 ETH juniors mainboard

Do you want to climb the next peak? 🏔️ Do you want to run your own business? Are you looking for an inspiring environment that challenges you? Do you want to bring your know-how to the industry and lead your own projects?

Then you've come to the right place! Apply now and become part of the ETH juniors mainboard! We are looking for motivated members for our team. At ETH juniors you have the opportunity to lead your own tech consulting company. We are an interdisciplinary and dedicated team of students who lead the company and projects with our industry partners.

Are you interested? Then apply by June 12th with your CV and motivation letter by emailing us at [contact@juniors.ethz.ch](mailto:contact@juniors.ethz.ch)! More details can be found [here](#).

### 📍 VIScon Hackathon - Call for mentors

We're excited to tell you that the VIScon Hackathon is back in action and we'd be delighted to have you as mentors for our Hackers. The Call for Mentors is now officially open and will remain so until the beginning of August. You will find detailed information [here](#). If you have any questions, please don't hesitate to contact [hackathon@vis.ethz.ch](mailto:hackathon@vis.ethz.ch).

### 📍 GirlsCodeToo - Call for mentors

Are you ready to inspire, motivate and empower girls into tech? GirlsCodeToo team is looking for amotivated German- & French-speaking student('s) to teach their Swiss Olympiad in Informatics Prep Lab. You will be trained by team members to teach tech skills in a fun and engaging way to girls between the ages of 8-18. Female and Male applicants are all welcome! Learn more [here](#).

## **® CONNECT - Connecting Women's Careers in Academia and Industry**

A lot of myths about the industry were dispelled, e.g., that one should jump out of academia as soon as possible. Instead the message was that the skills are the most important factor and doing a postdoc is not going to hurt you if it serves to acquire those skills.

The institutions of the ETH Domain, the University of Zurich and the NCCR Automation are proud to announce already the fourth round of the CONNECT program. If you would like to find out whether a position/career in industry could be something for you and you are interested in meeting role models from industry and public sector, go ahead and apply for the program.

Details and documents on the announcement and the application procedure are available [here](#).

## **® Robert Gnehm Grant**

Since 2016, ETH has offered financial support for 10-15 doctoral or postdoctoral researchers per year. Doctoral students and postdocs with small children or children in school age are awarded a grant in case they present their research results at an important conference or go on a short research stay abroad. For administrative and technical staff business trips/further education are sometimes necessary. Additional costs for extraordinary childcare may occur as well. The grant compensates in part additional childcare costs. Learn more [here](#).

This is a monthly newsletter sent out to all female students at D-INFK.
