How to hand in your assignments?

Lab Reports 1-4: You hand in your lab report both by e-mail and as printout to the assistant by the start of the next lab. Only the printout of the final lab report (lab report 4) you will bring directly to the assistant's office (CNB F 102.1), together with your project deliverable 2 and reference cantenna.

Project Deliverable 1: You bring your self-made (c)antenna to the lab and show it to one of the assistants. In turn, you will receive a reference cantenna that you will need in your measurement campaign to compare against your design.

Project Deliverable 2: You hand in your cantenna project report by e-mail and bring a hard-copy, together with the report of lab 4 and the reference cantenna, directly to the assistant's office (CNB F 102.1).
