

# The ETH Math Youth Academy

This program has been especially designed for Gymnasium students, age 13 or above, who enjoy mathematics and want to delve deeper into its exciting world. The regular weekly sessions take place at ETH Zentrum on Wednesday late afternoons and focus on creative, out-of-the-box mathematical thinking. The classes are fun, friendly, and intellectually challenging.

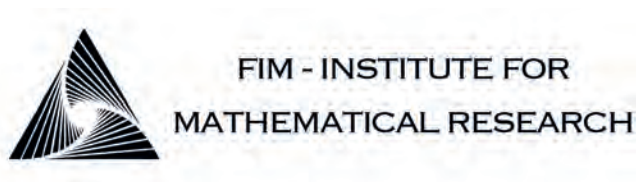

There are no prerequisites besides being comfortable with the standard school material and having the interest and motivation to come to ETH Zentrum for two hours of extra mathematics a week.

Some of the participants travel from Zug, Luzern, or even Solothurn or Romanshorn. There are three levels, so you can participate over the course of several years.

The program is free and you can attend as often as your schedule allows. You can register and join any time during the school year.

The treated topics reach beyond the regular Gymnasium curriculum and are not aimed at school exams. Instead, they can lead to participation in mathematical Olympiads.
