

Supply Chain Intern (f/m/d)

Company:	dimpora AG, www.dimpora.com
Location:	Zürich, Switzerland
Workload:	80-100%
Duration:	6 months (negotiable)
Starting date:	June/July/August 2023

At dimpora, we set new standards for the outdoor industry. With our award-winning membrane technology, we combine sustainability and performance on a new level. Thanks to the diverse possibilities of our patented platform technology, we keep innovating and developing new generations of waterproof and breathable membranes.

Do you want to help us turn innovative ideas from the lab into an industrial product, while being in the center of operations and getting insights into the whole value chain? Do you want to have a positive impact and at the same time create a product that could soon be part of your new ski or snowboard jacket? If you are interested in the above and keen for a challenging and exciting journey full of new learnings, then this could be the internship for you!

Your Tasks

- From Idea to Product

You will support your colleagues in scaling up the developments from our lab to industrial scale. You will have the opportunity to accompany our products in all its development stages all the way to their first full scale production and beyond. Throughout you can use your creativity and knowledge to support the team in finding, testing and implementing new processes and machines into production. The focus will be on thermoplastic compounding and extrusion, as well as industrial washing and lamination processes for textiles.

- Optimization and Quality Control

We are constantly challenging our existing production processes and look for ways to make them even more efficient, sustainable and cost-effective. As part of this, you will test the performance of the resulting membranes and analyze influences of the different processes.

- Coordinate and Communicate

As the internal interface between R&D and sales, you and your colleagues will be responsible for the production and quality of our membranes and laminates. In addition to the entire dimpora team, you will also work with suppliers and external production partners, where you can challenge and improve your organization and communication skills.

Ideally You Have...

- a technical background, e.g. BSc or MSc in engineering, material science, (polymer) chemistry, or a business background with strong technical affinity
- a practical approach to challenges, as well as a lot of creativity and fun in realizing new ideas
- a high degree of flexibility, perseverance
- a lot of motivation to learn, grow and take on new responsibilities
- good knowledge of English (and German would be preferred)

May 2023

We Offer...

- a chance to make a difference and contribute to a sustainable future of the outdoor industry
- an internship with a steep learning curve and the possibility to grow into a permanent position
- a broad insight into our supply chain and operations
- a dynamic and young start-up environment
- unforgettable team events, including monthly after-work events, as well as an annual dimpora day and team retreat

If you would like to become part of our team, we are looking forward to receiving your application with a few sentences about yourself and your CV.
