

Do your semester project or master thesis at a startup!

Project or thesis student, 60-100%, m/w/d

ETH Zürich, Campus Höggerberg (ZH)
several weeks to 6 months | temporary | start October 2023 or later

qCella is a soon to be founded deep tech startup from ETH Zurich and provides new materials for resistive heating applications. Our heating mats are paper-thin, flexible and heat entirely homogeneously. We want to replace the heating wire technology in car seats, clothing and shoes. Scan the QR code for further information about qCella and its team:

Your Tasks

- Participate in further product and new material developments
- Tackling research problems with real live applications
- Brainstorm, design and implement experiment series
- Fabricate lab samples and protocol results
- Execute quality measurements and analyses

Your Profile

- Master students in Materials Science or Chemistry
- Good oral and written communication skills in English and/or German
- High social skills, good team player, ability to work independently, and high sense of responsibility

Our Offer

- Interesting projects/theses that matter for the success of the startup
- Supervision by experienced researchers (ETH Materials Alumni)
- Exciting behind-the-scenes look at a startup environment
- Friendly and fun team
