

Poster guidelines

CSFM Kick-off Symposium

Friday, 6 May 2022

The PowerPoint template (POTX) with a predefined content structure for your poster can be found in our CSFM [extranet section](#) online. We suggest that you use this template, please feel free to adjust it to match your needs. In any case, please keep the logos and basic layout that allows the participants to identify CSFM and MI related work with future mobility at ETH Zurich.

- **Format:** Please draft and save the poster as A3 portrait. For optimal results with this template print it to A0 (118.9cm x 84.1cm). The default language is English. The poster board is self-standing. Pushpins will be provided.
- **Remember:** The flow of your poster should be as clear as possible, we suggest from the top left to the bottom right. Make your poster as self-explanatory as possible, so that you will have time for in-depth technical discussions and exchange with the other CSFM members and visitors.
- Please do not forget to **register to the symposium** and **upload** your poster file.
