

The Inside-Out Approach

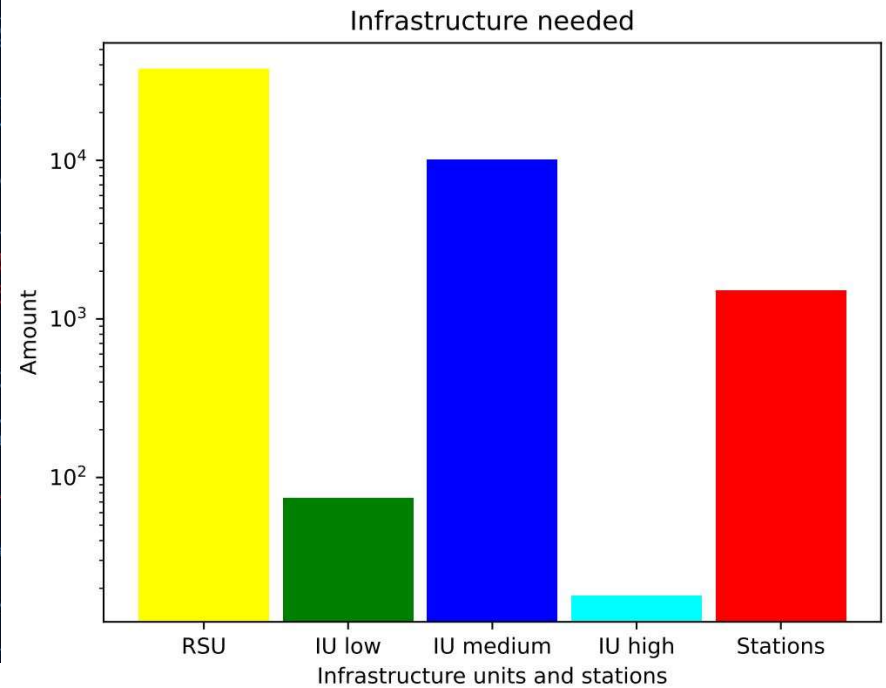

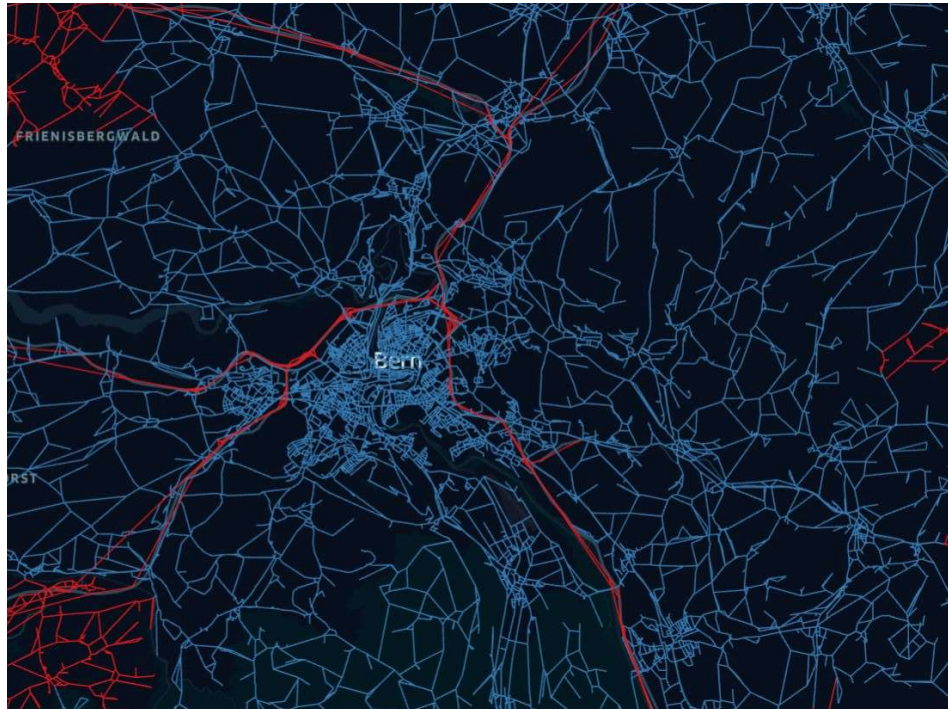

Study the rationale of autonomy-enabling infrastructure for different scenarios:

Some important questions we try to answer with case studies in the canton of Bern:

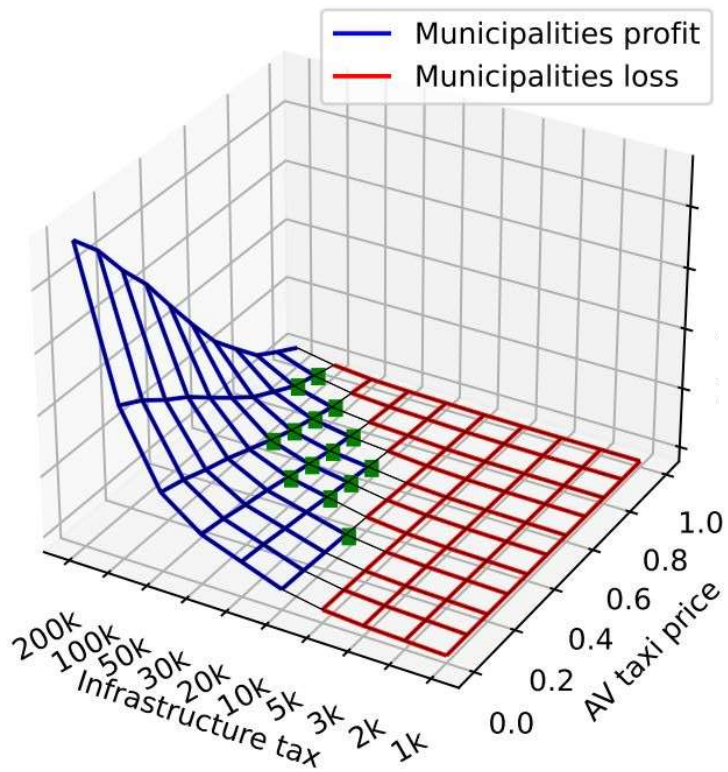

1. Profitability for Infrastructure Operator and AV Operator
2. Impact on environment (emissions) and customers (travel time, price)
3. Find the “optimal” streets to install the infrastructure

A first case study for Bern in 2040: Install infrastructure at all non-motorway streets

A first case study for Bern in 2040: Install infrastructure at all non-motorway streets

Profit for Municipalities after 5 year

Profit for AV Operator after 5 year
