

Professor Petros Koumoutsakos

«Find what you love and learn
how to do it well.»

Computational Science and Engineering Laboratory – Department of Mechanical and Process Engineering

We aim to understand nature and to solve problems in science and engineering through the fusion of models, algorithms, data and computers. We value critical thinking, curiosity and ethics. We seek to push boundaries in everything we do.

Research areas and methods

- Thinking
- Discussing
- Data
- Computing
- Artificial intelligence
- Fluid mechanics
