Working Student - Insight Generation (20%-40%)

PART-TIME

Verity is seeking a Working Student to help implement a machine learning solution. In this role, you will collaborate with machine learning engineers and product managers to deliver high quality training data for our algorithms. Your tasks range from picture annotation to data curation with data versioning software, allowing you to gain hands-on experience with real-world application of machine learning and its development process. As a young and modern company, Verity provides a very flexible working environment which will suit greatly to a part-time working student position of 20%-40% for two to three months. For example, you would be free to choose your working hours.

Verity is the global leader in autonomous indoor drone systems. Our integrated inventory tracking system enables zero-error warehousing for big box retailers, third-party logistics providers, and manufacturers. The system is used by industry leaders around the world, including DSV, Maersk, and Ingka, Sweden's most recognized furniture retailer. Verity's live events solutions help create stunning effects for top names in the entertainment industry like Drake, Céline Dion, Justin Bieber, Metallica, and Cirque du Soleil. We continuously reach beyond existing limitations to rethink, reimagine, and rework the role of robotics in the world today.

Come help us break new boundaries for drone systems and technologies!

WHAT YOU'LL DO:
- Assess and annotate data for our machine learning algorithms
- Learn and follow best data versioning practices
- Assess how different data sets used for training impact the performance of our algorithms

BENEFITS
- Flexibility of a hybrid work environment. You can arrange start and finish times around your life.
- A great engineering culture, including flat hierarchies, an open-door policy, and a focus on joint responsibility and mutual trust and support
- Welcoming office space complete with friendly team members, free snacks (fresh fruits, coffee, and more!), and fun activities—we're dog-friendly

WHAT YOU BRING
- Currently pursuing a computer-science / engineering degree
- Fluent in English, both written and spoken, German is a plus
- Additional plus:
  - Experience with image or video annotation tools (CVAT)
  - Experience with data version control (DVC)
- Sense of responsibility and diligence
- Ability to deliver quality results in a timely manner
- Team player with high problem-solving competence, capable of working autonomously
- Ability to work positively with a wide range of individuals and ensure collaboration for efficient delivery
- Attention to detail
