

The Art & Science collaborative presents:

SCIENCE in the OBJECTIVE

Scientific Photography Exhibition

Vernissage & Apéro

Student Project House, ETH, 20th February 2018, 6pm

Results of the Scientific Photography Contest organized by the Art&Science Collaborative

With this exhibition, the Science & Art collaborative brings science to the public. Scientists show their fascination for different fields of science, from physics to chemistry, astronomy and radiography, through the mean of photographs.

The exhibition shows 13 photographs which communicate the meaning of science and of scientific research the best. A jury of professional and amateur photographers, along with scientists, selected them.

The exhibition will be held in the Student Project House (Building HPZ at Hoenggerberg Zurich) and will be open for a few weeks starting Tuesday, February 20th at 6 pm.

You are warmly welcome at the vernissage and apero, on the 20th of February, or any day after from 7 to 7 Monday to Friday.
