

中国光学学会
THE CHINESE OPTICAL SOCIETY

October, 2024

Dear Prof. Ursula Keller,

On behalf of Chinese Optical Society (COS), I am delighted to inform you that you have just been elected to the grade of International Fellow of COS in recognition of your outstanding contribution to the photonics community and COS.

The International Fellow is the highest honor awarded by the COS to commend the scientists and engineers in the world for their outstanding contributions to the development of optics and photonics and to the photonics community. Prof. Gerard Mourou was among the first group in the COS inaugural International Fellow award in 2018. The fellow plaque and pin will be sent to you shortly.

The COS is a primary professional society of optics and photonics in China with more than 20,000 individual members. It has 26 professional committees specialized in every field of optics and photonics. The COS is also a member of the International Commission for Optics (ICO) which has a mission to contribute, on an international basis, to the progress and diffusion of knowledge in the fields of optics and photonics.

We look forward to your continued active participation in lasers and photonics and the support of the work of the Society.

Thank you very much and my sincere congratulations to you on receiving this prestigious honor!

Sincerely,

Ying Gu
