Abstract: A misprint occurred in our publication [Opt. Express 18, 17640 (2010)] in the second equation. The misprint is corrected here.

There is an error in Eq. (2) of our publication. The equation describing an elliptical laser pulse should read:

$$E(t) = A(t)(\sin(\omega_0 t) \cdot \vec{x} + \varepsilon \cdot \cos(\omega_0 t) \cdot \vec{y}) \qquad (1)$$

The misprint has no influence on the following calculations in our publication [1].
