

Schroedinger Lecture 2017

Monday, 23 October 2017, 16:45 h, ETH Zurich, Hönggerberg, HPV G4

Speaker: Prof. George F. Sterman, Stony Brook University, USA

Imaging Fundamental Processes: The Story of Jets

Jets at particle colliders are our window into fundamental reactions that sometimes proceed through confined degrees of freedom that are invisible at long distances. I'll review some of the history and theory of particle jets, and how they reflect a crossroads between classical and quantum phenomena.
