MaP Graduate Symposium in a Nutshell

WHAT IT IS

- The MaP Graduate Symposium is a symposium at ETH Zurich with about 180 participants, most of them doctoral students, postdocs, and professors.
- The programme comprises scientific talks, a poster exhibition, an image contest, industry presentations, and plenty of networking opportunities.
- The next edition will take place on 20 June 2024.

WHY YOUR COMPANY SHOULD PARTICIPATE

- Many doctoral students don't pursue an academic career after completing their studies, but opt for a career in industry.
- The MaP Graduate Symposium provides you with opportunities to present your company as an attractive employer.
- You can also directly interact with people interested in your company and answer their questions.

MaP Doctoral School

MaP Doctoral School is embedded in the ETH Competence Center for Materials and Processes (MaP).

Objectives

1. **Attracting diverse talents**
2. **Developing leading-edge thematic education**
3. **Cultivating collaborative research across disciplines**

Prof. Lucio Isa
Director MaP Doctoral
School

Klara Berg
Coordinator MaP
Doctoral School

MaP Doctoral School provides top-class international doctoral education in advanced materials, processes and manufacturing technologies.

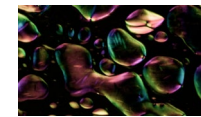

It is organised into five thematic tracks, each covering a future-oriented interdisciplinary research area.

Advanced Manufacturing

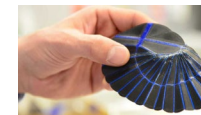

**Science and Technology
of the Small**

Soft Materials

**Strength & Durability
of Materials**

**Sustainable and Bioinspired
Materials**
