

DARIO BURRI

I was born in the countryside of Zürich and I did my studies at the University of Zürich. I have a very positive mindset and in my 2 years of Experience as a PhD student, I learned that even though many things seem extremely daunting, almost everything is manageable. We just have to get started and seek the support and help we need to reach our goal. Other PhD students are also going through a similar journey as us, with often the same experiences. Connecting, sharing, supporting and looking out for each other is what helped me a lot so far and this is also what I would like offer to you. Because I am convinced that we can handle problems or struggles a lot easier, if we share them with others.
