

**Prices for mass spectrometer and elemental analyses without VAT  
(August 2024)**

|                        | <b>Analyses<br/>(combined)</b>          | <b>Price [CHF]</b> |
|------------------------|---|--------------------|
| <b>Solid samples</b>   | C/N                                     | 5.50               |
|                        | <sup>13</sup> C or <sup>15</sup> N, C/N | 17.00              |
|                        | <sup>13</sup> C/ <sup>15</sup> N, C/N   | 25.00              |
|                        | <sup>18</sup> O                         | 38.00              |
| <b>Liquid samples</b>  | <sup>18</sup> O                         | 30.00              |
|                        | <sup>2</sup> H                          | 30.00              |
|                        | <sup>18</sup> O/ <sup>2</sup> H         | 50.00              |
| <b>Gaseous samples</b> | C, O                                    | 17.00              |

Use of **water extraction line**: 200 CHF/100 samples (including syringes, cannulas, vials, and filters)

The prices for ETH internal users and academic users within research cooperations are 50% less than the prices given above. Since 01.01.2010, there is no charge of VAT for the exchange of services for all institutions of higher education in Switzerland. Otherwise, a VAT of 8.1% will be added.

Please contact the IsoLab staff early to obtain relevant information about sampling and sample preparation. However, sample preparation is the duty of the user. The IsoLab can provide tin cups if needed. The IsoLab staff guarantees quality of analysis, please ask for the lab's long-term performance!
