## Swiss film screening “La veine verte”

Project exhibition, conversations,  
film screening and panel

2 November 2021  
Bern, Cinématte

Swiss National  
Science Foundation

# Prepared for dissemination

**From 2015 to 2021 research teams from 13 countries explored multiple dimensions of food security and innovations in agriculturalures. They share their results with you now.**

This r4d programme event celebrates in Bern, Switzerland, the achievements and messages of the research partnerships and synthesis in the r4d thematic module on “Innovation in Agricultural and Food Systems for Food Security”. To provide scope for information, exchange and debate, we offer these formats to you:

- Project exhibition: At several booths you will meet and interact with Swiss lead researchers, receive information about data and research evidence, watch video clips or debate policy implications.
- The film “*La veine verte – La renaissance agroécologique de l’Afrique de l’Ouest*” will be shown for the first time in Switzerland: You will watch the research documentary that emerged as a synthesis product from the r4d [Food Systems Caravan](#), portraying researchers, protagonists and experts from five countries in West Africa.
- Panel: We offer a moderated panel with experts from research, policy and development practice.
- Drinks and food: Our catering will give you energy and focus in conversations among the diverse and informed participants.

## DEBRIEFING AND TAKE-AWAY ACTIONS FOR SDG2+

On 3 November 2021, researchers and event organisers will meet with Swiss politicians and public administration members at the Bundeshaus.
