

Public engagement of scientists, trust in science, values in science

Viktoria Cologna

My research looks at how both scientists and the public view **the role of (climate) scientists in the public sphere**. Further, it focuses on how public engagement affects **trust in science** and credibility of scientists. I am also interested in societal perceptions of the **value-free ideal of science** and how they affect scientists' behaviour and public trust.

What is the role of trust for climate change mitigation and adaptation behaviour?
