

Assessing long-term resilience of hydropower production in Switzerland: A transdisciplinary research approach

Type: PhD project

Status: running

Team: Luise Fischer (IAC&IED), Heini Wernli (IAC), David Bresch (IED)

- How can climate information be analyzed such that it becomes more usable for a strategic decision-maker in the Swiss hydropower sector?
- We operate in a field of tension generated by conflicting principles of consulting, transdisciplinarity, and scientific research.
